

Dear colleagues,

please be reminded that the international Conference on Molecular Energy Transfer in Complex Systems is approaching. iCOMET 2017 will take place in Innsbruck, Austria from January 15 to 20, 2017, after being hosted in Chengdu (2015, China), Ventura (2013, USA), and Oxford (2011, UK).

IMPORTANT: The deadline for abstracts that will be considered for hot topic talks is coming up on Sept. 1st, 2017: there are only eight days left! Approximately 10-15 abstract submissions will be selected for hot topic talks. We welcome in particular contributions from young researchers and students.

Please submit your abstracts by Sept. 1st to be considered as hot topic. You find the abstract template and information on how to submit it on:

<http://www.icasec.uni-goettingen.de/icomet-2017/>

The website also provides information on the invited speakers, the conference program, venue and information on how to get to Innsbruck. The regular registration deadline is Oct. 1st. For any further questions please contact [<icomet@uibk.ac.at>](mailto:icomet@uibk.ac.at).

iCOMET brings together researchers who strive towards understanding complex dynamical problems such as reaction dynamics, molecular interactions at surfaces and in the condensed phase, biological molecules and technology applications. In this way the conference aims to support obtaining an atomic scale understanding of dynamical events controlling complex physico-chemical phenomena. The field is characterized by advanced experimental tools and has demonstrated a close connection with highly sophisticated theoretical analysis.

We looking forward to seeing you next year in Tyrol!

With best regards

Roland Wester and Alec Wodtke
