

ICASEC Summer School 2025

State of the Art Methods for Surface Dynamics

© Advanced Energy Materials

October 12-16, Göttingen, Germany

About the Summer School

The ICASEC Summer School provides a discussion platform for international postdocs and students with 8 leading experts in the field of surface dynamics.

Invited speakers will each give two 45 min presentations. A tutorial lecture on the fundamental principles and methods of their work and a seminar that covers their current research.

Participation in the Summer School is free of charge for students and post-docs.

Registration deadline 01.09.2025
